## Introduction

Dehydrated vegetable dryer is a dedicated equipment developed base on the traditional band dryer. It has the characteristic of just pertinence, practical applicability and high energy utilization rate, can be used in dehydrating and drying the vegetables, medicinal materials and fruits grow in variety of districts and seasons.

We are the most experienced dehydrated vegetable drying equipment manufacturing enterprise now in INDIA, our scientific and technical personnel follow-up service our customers in the long term, go deep into them to research and develop the equipment. Until now, we have developed the third generation of TSG series dehydrated vegetable drying equipment.

We manufacture according to the different characters of drying materials customers need and technological requirements, we design and manufacture the most suitable dry equipment with the best quality combined with years of the experience.

## Structure Principle and Application

Dehydrated vegetable dryer, which consists of belt conveyor, blanching and scalding machine, vegetable washer, automatic feeder machine, the dryer, coal hot blast heater, transmission and control system, is a series product and automatic continuous system drying equipment. It has the function of automatic feed and discharge, automatic control, small heat consumption, high production efficiency, simplicity of operation and maintenance, wide application, automatic temperature and speed regulation, can be used for drying vegetables, medicinal materials and

***(AN ISO 9001:2015 Certified Company)***

fruits of cabbage, carrot, cucumber, pumpkin, cassava slice, green sword bean, garlic bolt, Chinese medicinal crop slice, ginger slice, green Chinese onion, bamboo shoots, and the rhizome, rhizome stick and rhizome leave of them; also the fruits of areca-nut, date, grape, apple slice and kiwi fruit slice. It is the drying equipment with the highest automaticity so far in China and has the features of high drying speed, high evaporation intensity and good product quality. It is the most suitable for the materials that cannot adapt to the high temperature.

Multilayer dehydrated vegetable band dryer works by the gravity, the materials drop from the top net to the bottom net so that the materials can evenly turn over and fully contact with hot air, through which the material is dried and water is evaporated. It improves the drying quality and degree of uniformity. The feed inlet and discharge outlet are at each end of the equipment. It feeds with automatic conveyor, which is frequency conversion control and can be adjusted according to the characters of the materials. The equipment is easy to operate with automatic discharge. It is the optimal advanced drying processing equipment with low cost and high profit, which is used for dehydrated vegetable, Chinese medicinal crop slices and fruit industry

## Technical parameter:

### Conveyor Dryer

<b>MODEL NO.</b>		<b>: APS-ECD-5 TON/DAY</b>	
<b>Brand</b>		<b>: APS</b>	
<b>Overall Size of Dryer Approximate</b>		<b>: L10000x W1500 x H5000 (MM)</b>	
<b>System</b>		<b>: Continues Conveyor Dryer (Air Drying)</b>	
<b>Feeding System</b>		<b>: Feeding Through Top Conveyor Belt</b>	
<b>Conveyor Belt</b>		<b>: PTFE (width 4' Feet) 5 Belts</b>	
<b>Heat Through</b>		<b>: Infrared Heaters</b>	
<b>Temperature range in Heat Exchanger</b>		<b>: 45 to 70C Degree</b>	
<b>Main Drying Time In Dryer</b>		<b>: 3 Hrs. Approximate</b>	
<b>Feed Capacity</b>		<b>: As per depends Product</b>	
<b>Estimated Output</b>		<b>: As per depends Product</b>	
<b>Elect. Heaters</b>		<b>: Total Power of Elect. Heater 100 kw.</b>	
<b>S. S Belt Driving Motor</b>	<b>1 HP x 5 NS</b>	<b>:</b>	<b>Total Power for Dryer 27.75 HP(21 KW)</b>
<b>Supply Fan</b>	<b>2 HP x 8 NS</b>	<b>:</b>	
<b>Air-re Circulation Fan</b>	<b>3 HP x 2 NS</b>	<b>:</b>	
<b>Disintegrator</b>	<b>0.25 HP x 2 NS</b>	<b>:</b>	
<b>Feeding Leveler 1 No.</b>	<b>0.25 HP x 1 NS</b>	<b>:</b>	
<b>Insulation</b>		<b>: Insulation Thickness: 50MM Material: High Density Cerawool Material Used.</b>	
<b>Dryer Structure &amp; Material Contact</b>		<b>: M.S Spray Painted Structure &amp; Material Contact Parts are made by S.S 304 or Food Grade</b>	
<b>Conveyor Belt</b>		<b>: PTFE</b>	
<b>Insulated Panel</b>		<b>: CRC Spray Painted &amp; 50 MM Insulation with Imported lock Fitting to Check Material While Process</b>	
<b>Conveyor belt Supporting Rollers</b>		<b>: Galvanized Material, Bearing fitted</b>	
<b>Disintegrator</b>		<b>: S.S 304</b>

## TERMS AND CONDITION

### **1 Acceptance:**

A Purchase order from customer implies acceptance of the terms contained in this offer. Nonconformance to these terms may result in longer order processing and delay in Delivery. Order acceptance will be sent by A.P.S. Industries after receipt of Purchase order.

### **2 Placements of Orders:**

Please raise purchase order in the name of

#### **A.P.S. INDUSTRIES**

**30, Abhinav Arcade, between Manmohan cross road to ring road, Odhav, Ahmadabad**

### **3 Delivery time:**

1 -2 weeks from the date of order (excluding shipping time) The Company is not Responsible for losses incurred due to delivery schedule and transit delay.

### **4 Taxes and Duties**

Taxes and duties will be as applicable at the time of invoice.

### **5 Freight**

Freight will be charged extra at actual.

### **6 Insurance**

Insurance will be at an additional cost if required.

### **7 Packing & Forwarding**

Packing and forwarding will cost extra at actual...

### **9 Payment Terms:**

50% Advance along with PO, 50% before delivery.

### **10 Offer Validity:**

Unless revised earlier, this offer is valid for a period of 30 days from the date delivery schedule would change if ordered beyond the above mentioned date Extra (G.S.T. Other all taxes) as applicable. At our works, prior to dispatch.

***Others:** All transaction is subject to Ahmadabad Jurisdiction*
